### APHA 2022 Annual Meeting and Expo

APHA's Annual Meeting and Expo is where public health professionals convene, learn, network and engage with peers to share the latest research and information, promote best practices and advocate for public health issues and policies grounded in research.

Susy Safe's research team at the University of Padova participated in the congress with a poster titled: "Characterization of battery injuries in children: an analysis of the Susy Safe Registry and case reports from literature". The topic has attracted the attention of the public and the event has been an important opportunity to form new contacts for future collaborations aimed at further researching and preventing the occurrence of such injuries.

### Susy Safe Project activity: welcome to our new Country Representative form Turkey!

Susy Safe Working Group is happy to announce that the new representative for Turkey is Dr. Emrah Aydin from the Tekirdag Namik Kemal University.

# Susy Safe and 3D models: new frontiers in prevention

Starting in 2022, the international research project Susy Safe is collecting data on size and shape of foreign bodies that cause injuries in children. The new activity, launched by the University of Padua Team under the guidance of Prof Dario Gregori, is carried out thanks to a high precision 3D scanner. The Doctors already participating in the project are invited to join the 3D data collection project.

The Susy Safe Project counts with the participation of 57 countries!
