French M, Lorenzoni G, Purnima, Azzolina D, Baldas S, Gregori D, Gulati A. 2019 Sep; 124:6-13. doi: 10.1016/j.ijporl.2019.05.020. Epub 2019 May 21.
- Journal of Community Health.  
*Perception of Choking Injury Risk Among Healthcare Students.*  
Fano C, Lorenzoni G, Azzolina D, Giuliani A, French M, Campagna S, Berchiolla P, Gregori D. 2019 Oct;44(5):974-981. doi: 10.1007/s10900-019-00662-5.

## XV Congreso Internacional de Pediatría 2019, July 10-13, Monterrey, Mexico

The Congress represents a major event in the Latin American area for all professionals in the pediatric medical sector. The participants in the congress come mainly from Latin American countries and the United States. The congress counts with the participation of 90 experts from the area and over 35 internationally renowned speakers. Prof Gregori was invited by Dr Ricardo de Hoyos (ENT, Tec campus, Monterrey) to participate in the event with a recorded interview that was broadcast during the congress. In this interview, Prof Gregori presented the Susy Safe project, the results of the analyzes conducted on the data in the Registry and talked about the epidemiology of choking injuries in children.

## EU Safety 2019, Luxembourg, 3-4 October 2019

Organized by EuroSafe in collaboration with the Luxembourg Institute of Health, this conference covers a wide range of topics related to injury prevention and safety promotion, such as road safety, occupational safety, home and leisure safety and consumer safety. The conference also offers ample opportunities for cross-sectoral communications between sectors and disciplines to address issues such as: translating research into practice and politics; socioeconomic inequalities; aging societies; technological developments; social marketing; alcohol, fatigue and distraction.

On this occasion Prof Gregori presented "An Enhanced Model for Assessing Choking Risk in Children for Consumer Products". Picture from the conference are available on EU-Safety 2019 website.

Pdf file of the oral presentation of Prof Gregori is available online together with some other presentations from the conference.

## APHA Annual Meeting and Expo, Nov 2-6 2019, Philadelphia

The APHA (American Public Health Association) annual conference is the event where public health professionals introduce themselves, learn, network and interact with colleagues. It is the largest and most influential annual gathering of public health professionals with nearly 13,000 attendees taking part in the event to present, learn and find inspiration. On the occasion of this important scientific event, the latest research and information are shared, best practices are promoted and research-based public health issues and policies are discussed. This year's theme is "Creating the Healthiest Nation: For science. For action. For health".

Prof Dario Gregori, PI of the Susy Safe Project and Head of the Unit of Biostatistics, Epidemiology and Public Health (University of Padova) participated with Giulia Lorenzoni (Post-doc researcher at the University of Padova) in this important international conference with the work "Foreign body injuries estimated incidence rates variability: A comparison of the U.S. National Electronic Injury Surveillance System (NEISS) and the European Injury Data Base (IDB)" and the poster presentation "Epidemiological surveillance of pediatric injuries through the automatic classification of free text discharge diagnoses in pediatric emergency department records".

## SRA 2019, December 8-12, Arlington, Virginia

The internationally recognized congress is organized by the Society for Risk Analysis (SRA). Topics of interest at the annual congress include risks to human health and the environment including threats from physical, chemical and biological agents and a variety of human activities, as well as natural events. The theme of the congress, "Risk analysis in the era of data analysis", highlights the important role that risk analysts have in addressing risk problems and improving the science and practice of risk analysis.

Prof Dario Gregori, PI of the Susy Safe Project and Head of the Unit of Biostatistics, Epidemiology and Public Health (University of Padova), participated in the congress with the oral presentation: "The SusySafe Enhanced Model for Assessing Choking Risk in Children: an update after one year of implementation".
